SUMMARY

Senior Full Stack Engineer with 19+ years delivering high-impact Python systems at scale — migrating legacy monoliths to microservices on AWS/GCP, building CI/CD pipelines and serverless infrastructure that serve 50K+ to millions of users. Technical authority across Django, React, and cloud-native architecture, equally comfortable designing REST APIs, optimizing database performance, or mentoring junior engineers. Seeking senior/lead roles where architecture, execution, and business impact converge.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Go, HTML5, CSS3

Frameworks: Django, Django REST Framework, Flask, FastAPI, Celery, React, Angular, Vue.js

Cloud & DevOps: AWS (EC2, Lambda, S3, RDS, ECS/EKS, CodeBuild/CodePipeline), GCP (Cloud Functions, Cloud Run, App Engine, BigQuery), Docker, Kubernetes, CI/CD pipelines, Terraform

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Snowflake

Tools & Methods: Git, REST API design, Microservices, Jira, pytest, Selenium, code review, Agile/Scrum

EXPERIENCE

Freelance AI & Python Consulting

Mar 2025 – Present

Independent Full Stack / AI Consultant — Remote

- Delivering freelance Python consulting engagements spanning API development, data pipeline optimization, and legacy system modernization for small to mid-size businesses
- Integrating AI capabilities into client workflows using LLM APIs (OpenAI, Anthropic) and custom retrieval-augmented generation (RAG) pipelines, improving decision-making and automation coverage
- Architecting end-to-end solutions on AWS serverless stack (Lambda, API Gateway, DynamoDB, S3) with CI/CD pipelines for rapid, reliable deployments
- Advising clients on AI adoption strategy — identifying high-impact use cases, prototyping solutions, and training teams on prompt engineering and model evaluation best practices

National Services Group

May 2024 – Mar 2025

Full Stack Engineer / Senior Python Engineer — Irvine, CA

- Led migration of legacy Zope systems to Django and Flask for 6 brands, serving 50K+ users across home services and reconstruction platforms
- Architected AWS serverless solutions (Lambda, S3, EC2) and CI/CD pipelines (CodeBuild, CodePipeline, CodeDeploy), reducing infrastructure costs and streamlining release cycles
- Built scalable REST APIs with Django REST Framework and Flask, improving data accessibility and cross-platform integration
- Identified and resolved memory leaks in Python applications via profiling and caching strategies, stabilizing production servers
- Delivered features in 2-week sprints using Jira; mentored junior engineers and refined sprint workflows for consistent on-time delivery

Walmart / Sam's Club

Apr 2022 – Aug 2023

Senior Python Engineer

- Contributed to OPUS, a mission-critical Django/Python microservice powering product listings and transactions for millions of Sam's Club e-commerce users
- Developed RESTful APIs with Django REST Framework for product search, filtering, and inventory management
- Enforced PEP8 compliance and conducted rigorous code reviews, reducing technical debt and improving maintainability
- Streamlined CI/CD workflows using Docker and Docker Compose, ensuring environment parity across staging and production
- Resolved API response time and database query bottlenecks, enhancing reliability during peak traffic periods

Rabl

Jul 2020 – Feb 2021

Lead Developer

- Connected React Native app to backend APIs, improving data flow and user interaction for a pay-per-question expert platform
- Architected robust, secure APIs using Python frameworks, enhancing system security and reliability
- Implemented background task processing with Celery and RabbitMQ, handling 10K+ daily jobs at scale
- Leveraged Google Cloud services (App Engine, Cloud Functions, BigQuery) to scale the expert-consultation platform

AMP Agency

Nov 2018 – Dec 2019

Senior Software Engineer — Marina Del Rey, CA

- Developed Python/Django applications for clients including LinkedIn, Amazon, Facebook, and FX Networks
- Managed AWS infrastructure (EC2, RDS, ECS, Lambda, S3) for high-traffic deployments including Hollywood Bowl and LA Philharmonic
- Extensively customized Django Admin and utilized Lambda Functions to automate processes and reduce manual workload
- Cleared 6-month ticket backlog in 8 weeks using Jira, improving project timelines and team velocity

Cielo24

Jul 2018 – Oct 2018

Senior Software Engineer — Santa Barbara, CA

- Developed Python/Django applications for searchable caption delivery to large media partners in online education and entertainment
- Managed Kubernetes deployments ensuring high availability and efficient resource utilization
- Built an RPC service in Go, enhancing communication efficiency between distributed caption-processing systems

ConsumerTrack Inc

Apr 2018 – Jun 2018

Contract Senior Python / Data Science — El Segundo, CA

- Built an ETL pipeline with Flask and Snowflake, improving data processing efficiency and supporting business intelligence
- Developed Flask APIs and integrated with Snowflake to streamline data storage and retrieval processes
- Automated testing and deployment via CI/CD tools, reducing errors and accelerating release cycles

hintbox.ai

Jun 2017 – Nov 2017

Senior Python Contractor

- Built AI-powered applications for personal finance using Python, Flask, AWS Lambda, Elastic Beanstalk, and SQS
- Integrated trading algorithms with REST API endpoints, enhancing data accessibility and system performance
- Implemented Celery task queue and maintained PEP8 standards with CI for continuous integration

Blitz Agency

Nov 2016 – Feb 2017

Senior Python/Django Contractor

- Developed Python/Django applications and AWS Lambda integrations for FX Networks properties
- Integrated Akamai CDN and built API clients for Comcast Systems, enhancing content delivery and data exchange

Keypr

Jul 2016 – Nov 2016

Full Stack Engineer — Los Angeles, CA

- Built APIs and maintained Python (Flask/Django) and Node/Angular applications for cloud-based hospitality platform
- Implemented Celery background tasks and Redis caching layer, improving data retrieval speed and system efficiency

Woven

May 2015 – Mar 2016

Senior Developer — Los Angeles, CA

- Built custom JavaScript analytics tracking for male-focused content network reaching 85M+ monthly users
- Developed Python and Google Cloud Apps integrations enhancing web application performance

Zehnergroup

Jan 2014 – Mar 2015

Senior Developer — Los Angeles, CA

- Built applications using Python/Django, Node.js, AngularJS, and Go for clients including Metro.net and Tennis.com
- Developed custom IoT software integrating television sensors into multi-client advertising platform
